

Position as Student Assistant (HiWi) for Supporting the Knowledge Discovery Lecture

We are looking for a student to assist us in improving and conducting the lecture “Knowledge Discovery” and its accompanying exercise.

Typical tasks

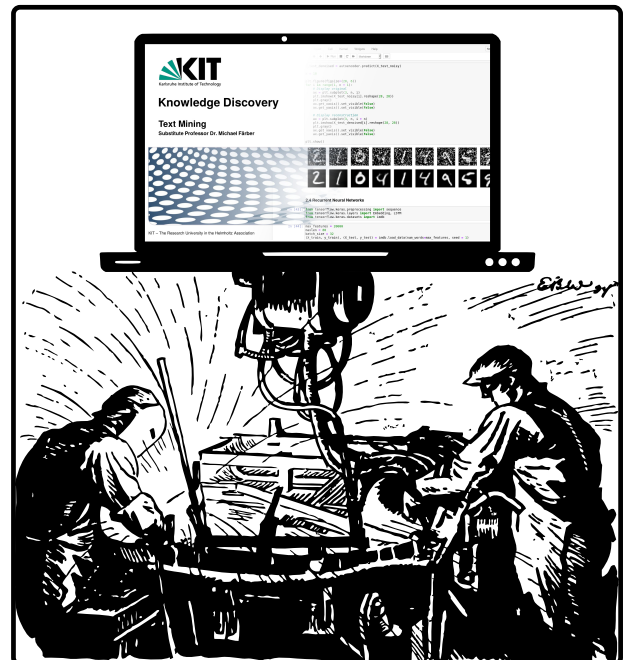

- Creation of Exercises
come up with engaging tasks that deepen the understanding of our lecture contents
- Coding
help with the implementation of the ML challenge accompanying the lecture
- Improving Slides
assist in the improvement of the lecture slides visually and content wise

Prerequisites

- You have fun working with data, using methods and techniques from machine learning, text mining, data science, etc.
- You are interested in state-of-the-art research on machine learning, NLP, and big data.
- You have at least basic programming skills (preferably in Python).

What we offer

- A contract with 40–85h per month. A salary of about 16€/h (depending on your university degree). Contract duration between 3 and 9 months (with the option of extension).
- Flexible working hours and the possibility to work from home.
- A variety of tasks, giving you the chance to learn a lot.
- The chance to assist in teaching state-of-the-art research.
